

Your cadet's Chromebook is their digital textbook.

Hargrave is enrolling it into our managed ecosystem to provide the tools—and the guardrails—that help cadets succeed.

At Hargrave, learning happens on a Chromebook just as it does with a printed book, notebook, and classroom. To give cadets the **tools** they need and the **guardrails** that help them stay focused and successful, **Hargrave enrolls personal Chromebooks brought for school use into our managed ecosystem** (our school Google environment and safety settings).

Enrollment is how Hargrave prepares and manages Chromebooks used for academic work. This form documents that you have been informed and understand what enrollment means for your family and your device.

What enrollment means

Hargrave IT will enroll the Chromebook into the school's management system. That lets us:

- Apply school learning tools and settings that support classroom work
- Turn on safety and focus guardrails appropriate for a high performing academic environment
- Keep the device ready for school use during the academic year
- Support your cadet when something goes wrong with school access or setup

The Chromebook **remains your family's property**. Enrollment is about a safer, more successful school experience—not taking ownership of the device.

Why we do this

Unmanaged personal devices make it harder for cadets to stay on task, use the same school tools as their peers, and meet expectations in the Student Handbook. Enrollment helps Hargrave provide a consistent, supportive academic environment—**tools plus guardrails**.

What families should know

1. **School settings will apply** on the device while it is enrolled. These settings support learning and safety (for example: safer search defaults, limits on certain browser modes, and school-managed apps/extensions). Some protections can apply even when the device is not on campus Wi-Fi.
2. **On campus**, internet access also follows Hargrave's network safety systems (separate from Chromebook enrollment itself).
3. **School management for school purposes**. While enrolled, the school may need to lock or reset the device in serious situations (lost/stolen, security concern, or required support).
4. **Device de-enrollment**. Your device will be de-enrolled from school management when your cadet is no longer enrolled at Hargrave (examples: graduation, dismissal, or withdrawal).
5. **Summer enrollment & re-enrollment surcharge**. Chromebooks stay enrolled over summer break. If you wish to de-enroll during summer, or we have to re-enroll the Chromebook, there may be a **\$40 charge** applied. Hargrave pays for the initial device enrollment as a courtesy.

Important: A full reset erases everything on the Chromebook—school files and personal files, saved passwords, and any other accounts on that device (including a sibling's, if the machine is shared). Please back up anything important before enrollment, and avoid sharing an enrolled Chromebook across the household when you can.

Parent / Guardian acknowledgement

I am the parent or legal guardian of the cadet named below. I have read this notice. I understand that my cadet's Chromebook **will be enrolled** into Hargrave's managed ecosystem as a digital textbook—with tools and guardrails to support academic success—and that a full device reset can erase all data on the machine.

I also understand that Chromebooks stay enrolled over summer break, the device de-enrollment policy, and that there may be a **\$40 charge** if the device is de-enrolled during summer or must be re-enrolled later.

☐ I acknowledge that I have been informed of Chromebook enrollment and understand the details above.
